EDUCATION

Al Akhawayn University (AUI) Ifrane, Morocco

Bachelor of Science in Computer Science Expected May 2028

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Web Development, Software Engineering

EXPERIENCE

Hiroden (Hiroshima Electric Railway) Hiroshima, Japan

Data Science Intern 2025 – 2026

- Analyzed transportation and operational datasets containing thousands of records to identify accident risk factors.
- Assisted in developing predictive models for accident prevention and railway safety improvement.
- Performed data cleaning, preprocessing, and exploratory data analysis to improve model performance.
- Collaborated with engineers and researchers to evaluate data-driven safety solutions.
- Presented findings and recommendations based on statistical and machine learning analyses.

PROJECTS

PokéLids Tracker — *JavaScript, HTML/CSS, Database Management*

- Developed a web application to help users discover and track Pokémon manhole covers (PokéLids) across Japan.
- Built dynamic location-based pages covering 100+ PokéLid locations with a searchable database and collection-tracking system.

PokeDoro — *JavaScript, HTML/CSS*

- Developed a Pokémon-themed productivity app combining task management with gamification mechanics.
- Implemented focus sessions, progress tracking, and reward systems; designed and deployed the full front-end experience.

Quran Recognition Application — *Python, OpenAI Whisper, Speech Recognition, Audio Processing*

- Developed a Shazam-style application capable of identifying Quran recitations from audio input.
- Integrated OpenAI Whisper for speech recognition and built audio-processing pipelines to match verses against Quranic text.

Discord Bot with MongoDB — *Python, MongoDB, Discord API*

- Built a Discord bot featuring automated commands, moderation utilities, and persistent user data via MongoDB integration.
- Implemented multiple server automation and management features for community use.

LEADERSHIP & ACHIEVEMENTS

National Water Conservation Hackathon — 1st Place Morocco

- Led a team that developed a technology-driven water conservation solution, competing against teams from across Morocco.

Sleep Technology Hackathon — Team President Marrakech, Morocco

- Led a multidisciplinary team developing tech solutions for individuals with sleep disorders; project recognized at the Marrakech Congrès du Sommeil.

International Exchange Program Hiroshima, Japan

- Selected to participate in an international academic exchange program; studied and collaborated in a multicultural environment.

Regional Public Speaking Competition — 3rd Place

SKILLS & INTERESTS

Languages: Python, JavaScript, HTML/CSS, SQL

Technologies & Tools: MongoDB, Git/GitHub, Discord API, OpenAI Whisper, Machine Learning, Predictive Modeling, Data Analysis, Database Design

Human Languages: Arabic (Native), French (Native), English (Fluent)
